SIRI ON APPLE DEVICES

You can only use Siri when connected to the internet. Using Siri is a quick way to get things done, like set an alarm, find a destination, book a ride or a table, or sent an email/text. The onscreen response from Siri often includes information or images that you can tap to get more info or take further action.

To Summon Siri:

- **iPhone X+: Press and hold the side button until Siri appears or alerts you, then make your request.**
- **Older than iPhone X: Press and hold the home button until Siri appears, then make your request.**

Turning on "Hey Siri": You can access Siri by saying "Hey Siri," and then make your request. To turn on this feature, go to Settings -> Siri & Search -> and enable Listen for "Hey Siri."

To make sure Siri always responds to you, go to Settings -> Accessibility -> Siri and change Voice Feedback to "Always Speak Responses." In addition, enable "Always Listen for Hey Siri."

Examples of how to use Siri include:

- **Defining relationships: "My wife is Kim," or "Call me Kanye."**
- **Searching contacts: "What is John's address," or "What is my father's phone number?"**
- **Making Phone Calls or FaceTiming: "Call my wife," "Redial the last number," or "FaceTime John."**

- **Sending, Reading, and Replying to Text Messages:** "Send a message to John," "read my new messages," or "Reply 'Hi!'"
- **Listening to Voice Mail:** "Do I have new voicemail?"
- **Sending, Checking, and Responding to Email Messages:** "New email to John," "Check email," or "Reply, 'Hi!'"
- **Reading Notifications:** "Read my notifications."
- **Commanding your Calendar:** "Schedule a meeting with John for tomorrow at 2pm."
- **Setting Reminders or Timers:** "Remind me to check the mail."
- **Creating or Finding Notes:** "Note that I spent $25 on dinner."
- **Getting Directions:** "How do I get home?"
- **Command Your Music:** "Play work playlist."
- **Check The Weather:** "What's the weather like today?"
- **Search The Web:** "Search for images of dogs."
- **Opening Apps:** "Open Mail."
- **Changing Phone Settings:** "Turn on airplane mode."
- **AND MORE!**
