Try CloverBook Pro today and get all the power and features of a desktop CCTV with speech; in a much lighter, portable and more affordable package.

The CloverBook Pro boasts unique features like a user-replaceable battery and very discreet additional camera that folds out for distance and self-viewing. With CloverBook Pro, you even have the option for split-screen, so you can view notes on your desk and see a presenter/instructor at the same time. Add the additional screen, and you can view both cameras on separate 12.5-inch screens, simultaneously. If you want to hear your document read aloud, press the “T” button on the front of CloverBook to scan any text in view or enter the scan mode and scan the entire letter-sized page at once.

Perfect for students and professionals who need to read documents and write at their desk, while also viewing an instructor/presenter, the CloverBook Pro’s portable design makes it easy to move between class, work and home.

While at home, the CloverBook Pro makes an ideal partner for reading. When you’re not using it, you can quickly fold it down and put it away. And when you head away on vacation, CloverBook Pro packs up easily in a case to come along for the ride.
