- Can be connected easily to a large screen TV
- Auto shutoff after 1, 2, 5 or 10 minutes
- Battery life : 4.5 hours

The Big Picture in a Small Package:

More than ever, people with low vision are looking for a powerful yet lightweight tool to help them see clearly in their daily activities. The explore 8, a Touchscreen HD handheld magnifier for active people who prefer a large screen but still want maximum portability. It is smaller, lighter and more affordable than most 7-inch magnifiers on the market while providing a screen more than 30% larger, designed to make life easier – and a whole lot clearer.

Delivering unmatched image quality, the explore 8 features two 21 megapixel cameras – one for things less than 15 cm away like documents, books and newspapers, and a second camera for distance viewing away to see things like street and store signs.

The device boasts the largest screen in the smallest package, designed with the latest technology, innovative features and an easy to use touchscreen for unmatched mobility, comfort and convenience wherever you go.

Cutting-edge Design:

With its compact design & smart, intuitive features, the explore 8 is changing the way low vision people experience and interact with the world around them.

- **Intuitive touchscreen**
- **Easy to use with few buttons**
- **Customizable features like preferred zoom level setting**
- **Automatic toggle to switch easily between desktop and distance viewing**
- **Rubberized grip to hold the device**
- **Solid reading stand that sets up quickly and easily**
- **Elegant, streamlined design**
- **Compact and lightweight for life on the go**

Exploring the world has never been easier. Now with the explore 8, people with low vision can enjoy all the benefits of a large screen in a compact, portable package with zero compromise on style, quality and compromise on style, quality and comfort.
