

# MagniLink S Premium 2

**Fits all your needs:** MagniLink S Premium 2 is the ultimate video magnifier for you with high demands on both quality and mobility. It offers superior image quality, modern technology and really smart features. It's also easy to carry, for example, between home and school or a workplace - and can be connected to a computer (PC/Mac/Chromebook) or a monitor. Thus, you can choose the features and options that fit your needs.

**Superior image quality:** MagniLink S Premium 2 excels in brightness, sharpness and contrast, and the unit has the latest technology. The result is a superior image for maximized reading speed and reading endurance. You get the MagniLink S Premium 2 with a Full HD camera.

**Full HD quality:** The MagniLink S Premium 2 with Full HD (1080p), an image transfer of 60 full digital frames per second, high brightness/contrast and a high quality, light sensitive camera lens, for flicker-free images and sharp edges offers exceptional image quality. With Full HD, even more details can be viewed in texts and images and the sharpest possible image in both reading and distance mode. Full HD also offers an even lower initial magnification, providing a better overview of the materials to be scanned and OCR processing of a full A4 page with optional Text-to-Speech (TTS) feature.

**Simple and flexible:** MagniLink S Premium 2 is always accessible; sets-up and is ready to use in virtually seconds. The foldable support legs minimize the footprint, and makes it possible to place the unit tightly alongside a laptop, either on the left or the right side. Fits perfectly also on small desktops. It's easy to switch between distance and reading mode. Just turn the camera head and flip up the camera lens and your MagniLink S Premium 2 becomes a distance camera in a second. The user will never worry about battery strength or misplaced battery chargers as the unit is powered by the computer.

**Included software:** Software for computer connection is included. The software controls the unit's features, such as magnification, artificial colors and brightness and provides the user with the facility to make individual adjustments for the best possible experience. For increased participation – in school, at work and at home! The software is available in versions for PC (see MagniLink PCViewer), Mac (see MagniLink MacViewer), and Chromebook (see MagniLink ChromeViewer) – all of them have unique and innovative features.

MagniLink S Premium 2 is compatible with ZoomText and SuperNova.

**TTS (Text to Speech) as an option for PC and Mac:** For PC and Mac you can add TTS as an option. It provides multiple functions, including speech output. To have text read aloud enables increased reading speed as well as endurance. Text is read line by line, word by word, character by character, picture and word and picture and line, and can be presented on the screen, synchronized with the audio. The software automatically detects the language being used in the text and reads the text with a corresponding voice.

The text can be saved and opened in a text editor for proofing or processing. Up to a full A4 page (US Letter) can be scanned at once and by using keyboard commands you can quickly and efficiently scan multiple pages in a matter of seconds.

### **Optional Accessories:**

- Smart docking station with X/Y table for an additional \$920. With a docking station you convert your MagniLink S Premium 2 into a stationary system when needed. Dock and undock in seconds to switch between a stationary and a portable system. The X/Y table has friction brakes in both directions and the docking station is supplied with an external control panel.
- A docking plate for an additional \$770.

**MagniLink S Premium 2 (1080p): \$3,995**

**English TTS on Windows or Mac OS: + \$300**
