

VISION BUDDY

Vision Buddy is the world's first ultra-simple Television Watching System for the Visually Impaired. Plug the Vision Buddy Streamer to an existing cable TV box or any other TV provider like a Roku, Amazon Fire Stick or connect directly to a Smart TV using the included HDMI cord to watch live television through the headset. This device is specially designed for various low vision eye conditions like Macular Degeneration, Glaucoma, Retinitis Pigmentosa, and more! Zoom in or out to enjoy a movie theater experience right in your living room. With the movie or show projected right into the headset, you get an experience that only Vision Buddy can provide!

Vision Buddy has combined the perfect features of both comfort and convenience. Watch TV while laying down and zoom in on subtitled movies!

With a click of a button switch to magnification or "live mode" to use Vision Buddy for daily tasks too! See the world around you, check the microwave, see faces, and more!

Watch TV Clearly

Vision Assistant

Advanced OCR

Enjoy your favorite TV shows and movies, once again. Zoom in or out as per your needs while watching HD quality video with real-time image correction.

Vision Buddy comes with a digital magnifier. See your surroundings, watch your loved one's faces, read books, change the thermostat settings, etc.

Use the built-in Optical Character Recognition (OCR) feature to have Vision Buddy automatically read aloud your favorite books, newspapers, medicine labels, restaurant menus, etc.
