

NOW OFFERING

SPECIALTY CONTACT LENSES

The Chicago Lighthouse provides expert specialty contact lens fittings for patients with complex vision needs—offering custom solutions that restore comfort, clarity and confidence.

Our low-vision experts can help those with certain diagnoses—such as albinism or nystagmus—who might benefit from specialty contact lenses.

Our specialty contact lens fitting provides customized solutions for individuals with unique corneal shapes or medical conditions, addressing vision needs that standard contact lenses cannot.

Working with trusted providers such as Art Optical and Synergeyes, our solutions include:

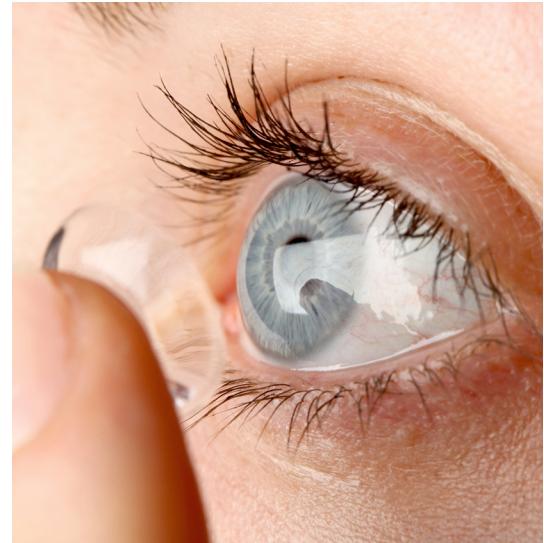

- Lenses for extremely high prescriptions
- Rigid gas-permeable lenses
- Hybrid, tinted and custom-designed lenses
- Scleral lenses

Our goal is to help our patients and providers find solutions that improve their vision and comfort, while increasing their confidence.

To schedule an appointment or ask questions, call: (312) 997-3686
